Subject: RE: PFAS Council draft response on stakeholders

Here is the info on the ECOS ongoing effort; Lisa Matthews is the EPA POC

EPA's Office of Research and Development (ORD) hosts a bimonthly call with ECOS, ASTHO and interested state representatives on PFAS. These calls are an opportunity for EPA scientists and our state partners to share science and technical information related to PFAS. Topics include analytical methods, human health and toxicity, site characterization, exposure and remediation, and treatment. If you would like to present on an upcoming call, please contact [Lisa Matthews](#)

Is the intention to include industry stakeholders too? If so,

- ACC – They disbanded the “Fluoro Council”, but apparently are addressing PFAS issues through several other subbodies, notably, there is a “Performance Fluoropolymer Partnership (PFP)”
- <https://www.americanchemistry.com/Media/PressReleasesTranscripts/ACC-news-releases/Performance-Fluoropolymer-Partnership-Launched.html>
 - Organizations and individuals interested in working with the PFP can contact Jay West at jay_west@americanchemistry.com.
 - They recently release a paper: <https://www.americanchemistry.com/Media/PressReleasesTranscripts/ACC-news-releases/PFAS-Coalition-Releases-New-Paper-Providing-Context-Details-On-Number-of-Compounds-Existing-in-Current-Commercial-Market.html>
- HCPA – have been doing outreach/data gathering on the ‘container’ issue. (I believe Ed M talked to them early on and we had a recent meeting where the container issue came up).

Subject: PFAS Council draft response on stakeholders

Tala,

Here is the list of stakeholders I was going to respond back to Joe Tiago with based on the Council follow up action items.

- ECOS <https://www.ecos.org/> they have active efforts on PFAS, see <https://www.ecos.org/pfas/>
- Mosquito control districts based on PFAS in packaging issue <https://www.epa.gov/pesticides/pfas-packaging>
- USDA based on PFAS in packaging issue since some ag products are now being mentioned – e.g., some of the common herbicides <https://www.epa.gov/pesticides/pfas-packaging>
- Trade organizations such as RISE <https://www.pestfacts.org/>, Crop Life America <http://www.croplifeamerica.org/> and American Chemistry Council <https://www.americanchemistry.com/default.aspx>

We could also use existing list serves and standing committees like OPP PPDC for applicable messaging <https://www.epa.gov/pesticide-advisory-committees-and-regulatory-partners/pesticide-program-dialogue-committee-ppdc>.

Thoughts?

Thanks,

Jeff
